PRISMA DAPS ES-400 EXTERNAL LOUDSPEAKER

External Loudspeaker

Prisma Daps ES-400 can be used with the acoustic pedestrian signals as a external loudspeaker. Especially effective in noisy intersections with need of a strong sound focused directly to the pedestrians that will cross the intersection.

Noise Control by Prisma Daps

Noise control is regulated by the Prisma Daps 2000 which the external loudspeaker ES-400 is connected to.

Amplifies

Prisma Daps ES-400 amplifies the locator sound during green phase. The locator sound is help for pedestians to locate and get the status of the intersection.

Mounting

To be mounted on the pole, about 2.5 meter above the ground level, facing the opposite side of the crosswalk/street.

Aluminum

Prisma Daps ES-400 is a strong and reliable loudspeaker protected by the housing of anodized aluminum profile.

Cabling

Included: 3 meters Ölflex 2x0,5mm²

Required: Prisma Daps connected with 10- or 13-wire cabling.

Connection

Directly connected to all

- Prisma Daps 2000•L-series
- Prisma Daps 2000•M-series
